Location Services

Interactive Patient Care

Campus Flow Room

Careview

Features

Patient Fall Prevention

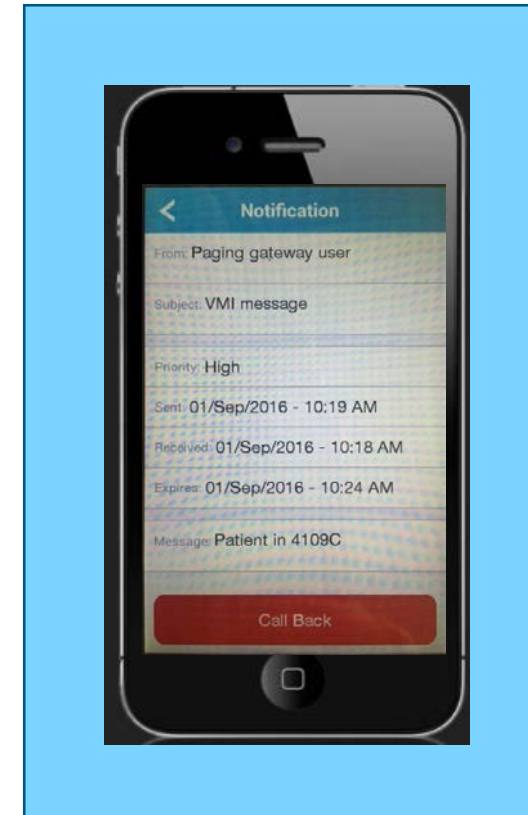

- 24/7 monitoring of multiple patient rooms at once via in-room cameras
- Alerts sound and display directly on nurse workstation freeing nurse to complete other activities
- When patient crosses virtual guardrails, visual and auditory alerts are triggered

Integrated Healthcare Communications

Features

- Provides staff with smartphone-based communications platform
- Enables direct communications over a choice of voice, text and eventually video
- Removes the need to know or look up a name or number in favor of directly communicating with the role you need
- Staff will have actionable information sent to them by the system to improve safety, increase efficiency and improve staff satisfaction (e.g., critical lab values, patient monitor alarms)

Crestron

Features

Patient Safety + Room Controls

- Panel display on wall outside patient room
- Displays patient name, patient safety icons, room temperature
- Room control keys – temperature, lights, and blinds

GetWell Network

Features

Interactive Patient Care

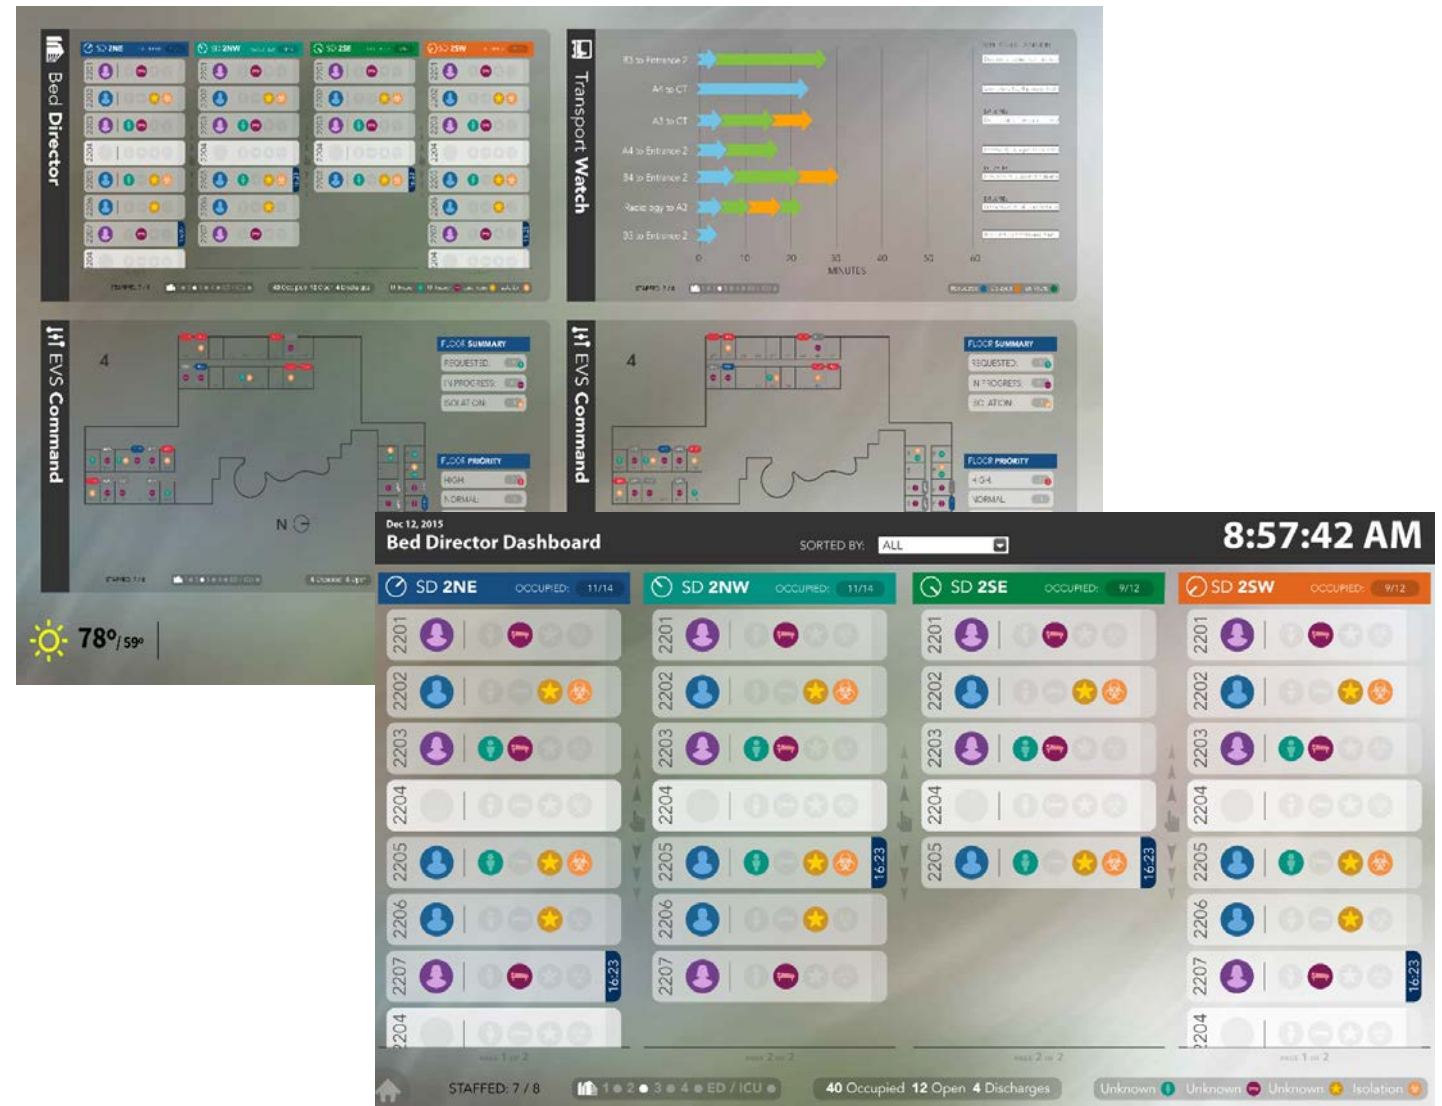

- Electronic Care Board
- Patient educational videos
- Patient medication information
- 2-way video enables virtual physician rounding
- Internet access & Hollywood movies
- Meal ordering, filtered per dietary restrictions
- Integration with KPHC

Campus Flow Room

Features

- Provide campus and patient information to the hospital team
- Evaluate the building maintenance system
- Operational efficiency
- Bed management

La Habra Medical Center

- Part of Reimagining Ambulatory Design
- 24,000 sq ft/ 2229 sq meters
- 20-40% increase in exam room use for face to face visits
- 10% cost savings per square foot due to design efficiencies and technology

Garfield Innovation Center

- 37,000 sq ft/3437 sq meters
- Prototyping space for hospitals and clinics
